   a. Supply Donations
      At this time, donation operations are at capacity and cannot accept any more material donations. Shelters and various locations throughout the County have also been impacted by the overabundance of your generous donations.
   b. Monetary Donations:
      The best way to help at this time is through monetary donations to trusted organizations. Monetary donations are the easiest to manage and provide the means to purchase the exact items in need. Please utilize trusted organizations for monetary donations to avoid potential scams. Some recommendations:
